

NYC GRASS CUTTING MAP

Grass cutting map

You can use our online map to find out who is responsible for cutting urban highway grass in each parish in North Yorkshire. Urban highways are roads with a speed limit of 40mph or less.

If you zoom in to street level on this map, you will see areas with a dark blue edge. These are the locations where we cut the grass or pay the parish or town council to cut the grass on our behalf. These areas will be cut five times a year.

Areas without a dark blue edge are not cut by North Yorkshire Council. Grass cutting in those areas is at the discretion of the town or parish council.
